SCOTT GLOVES 2014.15

SCOTT OUTERWEAR

SCOTT'S OUTERWEAR LINE IS DIVIDED INTO MOUNTAIN AND SNOWSPORTS AND FOCUSES ON THE SPECIFIC NEEDS OF THE DIFFERENT TARGET GROUPS.

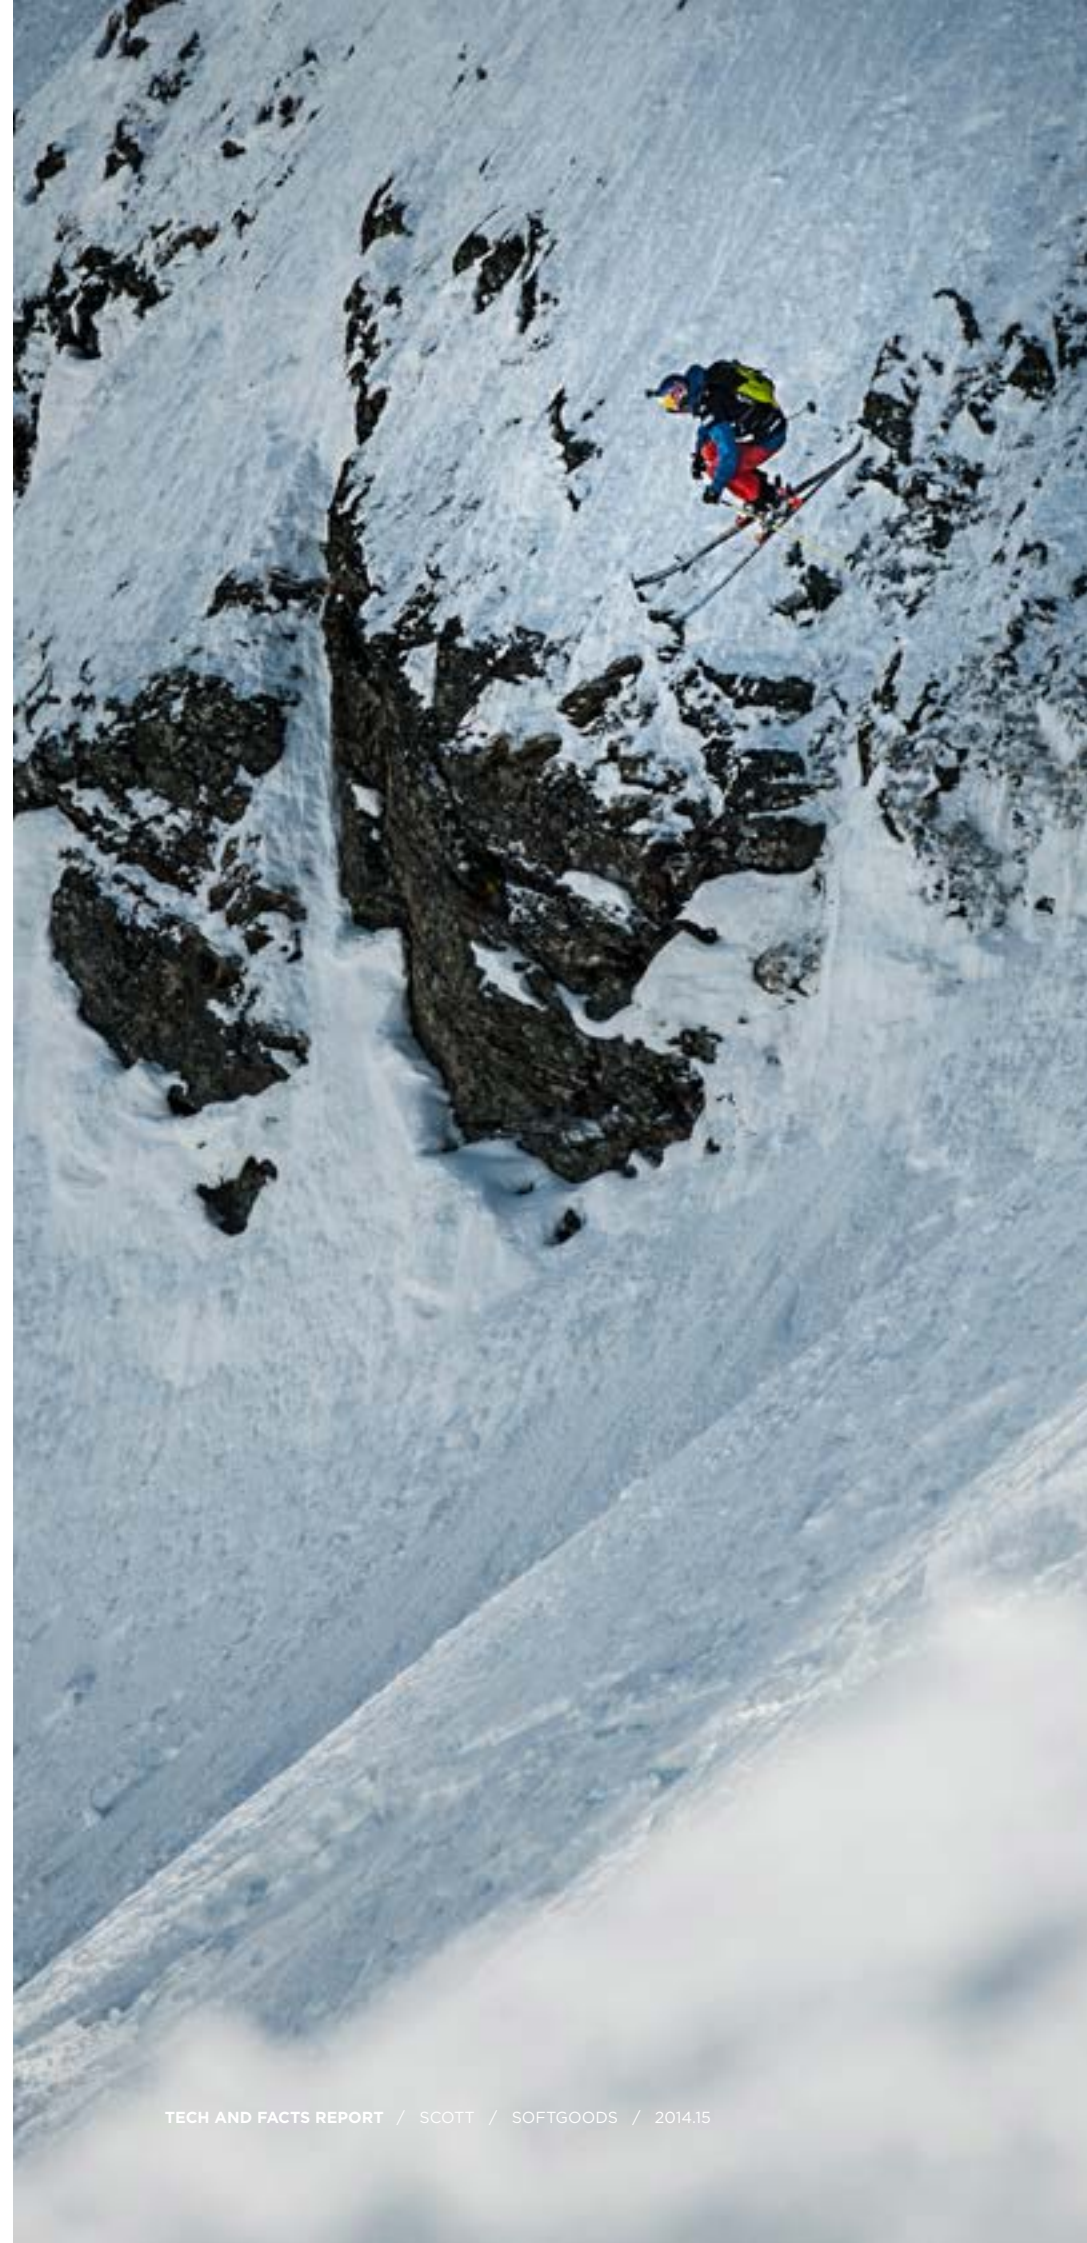

MOUNTAIN

Created for mountain athletes all over the world, SCOTT's 2014.15 Mountain Apparel Line addresses the need for versatility in combination with high performance. Using the industry's leading and most technical fabrics from GORE-TEX® and Toray, SCOTT's Mountain Apparel tackles the differing needs of all athletes; whether you prefer to spend weeks in the backcountry or a good powder stash off the backside of your local ski hill. With new concepts ranging from 3-in-1 jackets to hybrid insulators, function and versatility drive the 2014.15 collection - offering innovation and technology in every design.

SNOWSPORTS

SCOTT's 2014.15 Snowsports Collection is a seamless blend of performance and style in a variety of designs that answer the needs of skiers from coast to coast and around the globe. With high-end performance from the leading manufacturers of technical ski fabrics, including GORE-TEX® and Toray Dermizax®, and insulations, like Thinsulate™, the dependability in performance of each piece is never in question. With a range of fresh styles, innovative solutions to create versatility, and a fresh color palette, SCOTT's Snowsports Collection is an array of eye-catching and appealing designs artfully camouflaging premium performance and technology.

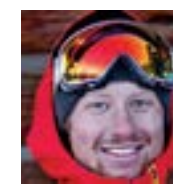

Fabian Lentsch (AUT),
SCOTT Freeski athlete

"For the last two seasons I have been riding in the SCOTT Ridge outfit. For me, it is the perfect match in terms of fit and style. It's the right size for both mountaineering and freeriding. I really like that it is engineered with robust fabric, including a lot of technical features such as the ventilation system, which is very effective. At the same time, the outfit keeps me warm and dry no matter how tough the conditions. Sometimes I use the outfit for paragliding and speedgliding, or off the mountain when I am in the city, or just going for a walk when it is raining or snowing."

WHAT IS NEW ON SCOTT OUTERWEAR 2014.15?

SCOTT RIDGE OUTFIT

MOUNTAIN FEATURES JACKETS

- 1 Pack friendly seamless shoulders
- 2 Arm articulation
- 3 Water resistant zippers

4 Full interior windflaps

5 Anti-chafe chin guard

6 One-hand adjustable hem

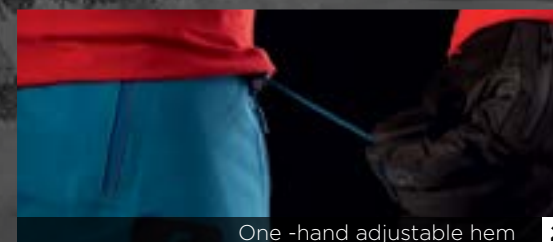

MOUNTAIN FEATURES PANTS

- 1 Fully taped seams
- 2 CORDURA® abrasion resistant scuff panels
- 3 YKK AquaGuard® zippers
- 4 Exterior leg venting
- 5 Adjustable waist

SNOWSPORTS FEATURES JACKETS

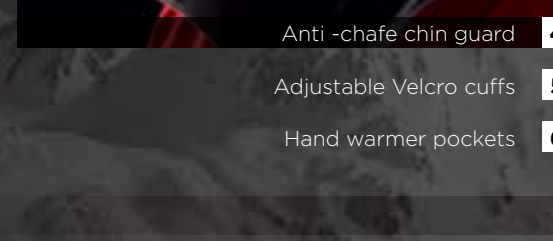

1 Powder skirt with jacket -to -pant interlock system

2 One -hand adjustable hem

3 Internal security pocket with media portal

4 Anti -chafe chin guard

5 Adjustable Velcro cuffs

6 Hand warmer pockets

SNOWSPORTS FEATURES PANTS

- Fully taped seams 1
- CORDURA® abrasion resistant scuff panels 2
- Knee articulation 3
- Exterior leg venting 4
- Pant-to-jacket interlock system 5

SCOTT LOMBARDO 150 OUTFIT

OUTERWEAR FABRIC TECHNOLOGIES

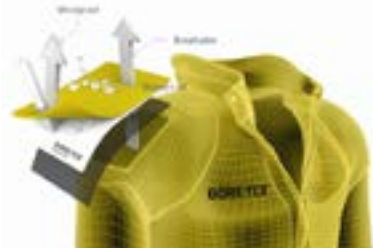

OUR RESEARCH AND DEVELOPMENT TEAM WORKS WITH LEADING MANUFACTURERS AROUND THE WORLD TO DELIVER REVOLUTIONARY FABRIC TECHNOLOGIES THAT PROTECT YOU FROM THE ELEMENTS AND MAXIMIZE YOUR ENJOYMENT OF OUTDOOR ACTIVITIES, 365 DAYS A YEAR.

SHELL FABRICS:

GORE-TEX® products

Garments engineered with GORE-TEX® technology are durable, water and windproof, and feature optimal breathability. They are built to maximize protection and comfort.

GORE-TEX® Pro products

Engineered for maximum durability and performance in the most severe conditions, GORE-TEX® Pro NG is ideal for extreme and extended use. With the bonded GORE-TEX® Pro NG membrane, fabrics increase durability due to decreased friction and see an increase in breathability by 28%.

GORE-TEX® Active products

Engineered for highly aerobic activities in unforgiving environments, GORE-TEX® Active is ideal for situations where you need maximum performance at a minimal weight.

WINDSTOPPER® Soft Shell

With total windproof protection and excellent breathability, WINDSTOPPER® softshell combines the comfort of a soft midlayer with the water resistance of a shell.

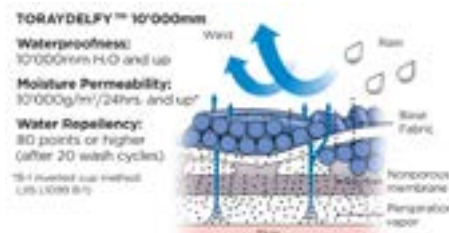

Toray Dermizax®

Ideal for heavy duty applications, Toray Dermizax® offers exceptional waterproofness, moisture permeability, and condensation while still offering durable protection. A smart, non-porous membrane helps to absorb perspiration vapor and disperse it through the fabric. With smooth texture, lightweight configuration and high elasticity, garments are noticeably softer and enhance wear comfort.

TORAYDELPHY™

TORAYDELPHY. TORAYDELPHY™, a non-porous membrane, provides durable water repellency, moisture permeability, and wind protection that is also soft and supple to touch. Ideal for intense activity applications, TORAYDELPHY™ creates a waterproof barrier that is also highly breathable, keeping you drier from the inside by allowing perspiration vapor to escape and disperse through the garment without building up.

INSULATION:

PrimaLoft® ECO

Utilizing post-consumer recycled material, PrimaLoft® ECO is a high-loft, thermally efficient, and earth-friendly insulation.

3M Thinsulate™ Insulation

Inch for inch, no insulation keeps you warmer than Thinsulate™, providing up to two times the warmth of other high-loft insulation materials and nearly 1.5 times the warmth of down.

Strategic Thermal Regulation

Representing the most advanced placement of insulation and wicking materials, Strategic Thermal Regulation (STR) results in dynamically performing lightweight garments. STR places insulation where you need it in cold zones and performance mesh in hot zones. The strategic placement ensures the garment will keep you warm and dry without unnecessary bulk.

OUTERWEAR MOUNTAIN HIGHLIGHT

With the new SCOTT Solute 3-in-1 collection, you'll be prepared for the coldest days – from red-line ascents to max vert descents. With a vest that wears easily on the outside of your jacket, layers on the inside, or stuffs easily into your pack, you can layer-up or strip down on-the-go without compromising your protection. The Solute jacket and pant are cut from TORAYDELPHY™, a soft and comfortable shell fabric that provides additional protection from the inside by allowing perspiration vapor to escape and disperse through the garment, without building up. The jacket and pants ensure premium waterresistance and breathability, and the vest features water-resistant down (Allied Resist Down™) that stays drier and loftier in wet conditions, providing indisputable protection from the elements. The Solute has you covered from head-to-toe so you can spend the day sending it in style.

WOMEN'S SOLUTE:

JACKET – engineered with TORAYDELPHY™ 3 Layer Shell

VEST – engineered with 650 fill water-resistant down

PANT – engineered with TORAYDELPHY™ shell fabric and CORDURA® scuff panels

MEN'S SOLUTE:

JACKET – engineered with TORAYDELPHY™ 3 Layer Shell

VEST – engineered with 650 fill water-resistant down

PANT – engineered with TORAYDELPHY™ shell fabric and CORDURA® scuff panels

OUTERWEAR SNOWSPORTS HIGHLIGHT

QUORRA 150 WOMEN'S JACKET

Designed for maximum performance, the Quorra 150 delivers for even the most demanding skiers. Durable, tough, but soft to the touch, the GORE-TEX® 2 layer provides a waterproof and windproof barrier while Thinsulate™ STR insulation keeps you warm where you need it the most. Subtle highlights mix with the clean aesthetic to create a timeless jacket that will withstand the test of many seasons.

WOMEN'S QUORRA 150:
JACKET - engineered with GORE-TEX® shell fabric and Strategic Thermal Regulation featuring Thinsulate™
PANT - engineered with GORE-TEX® shell fabric and CORDURA® scuff panels

MEN'S LOMBARDO 150:
JACKET - engineered with GORE-TEX® shell fabric and Thinsulate™ insulation
PANT - engineered with GORE-TEX® shell fabric and CORDURA® scuff panels

LOMBARDO 150 MEN'S JACKET

When performance means everything, look no further than the Lombardo 150. Top of the line features come together with GORE-TEX® 2 layer and Thinsulate™ STR insulation to create the most durable and protective jacket that can also regulate your temperature. Whether you're going big or facing the worst winter weather, you'll stay warm, dry, and comfortable. Casually confident, you'll easily tackle any winter adventure with the Lombardo 150.

LAYERING:

SCOTT GLOVES

MOUNTAIN GLOVES

The 2014.15 Mountain Glove Collection showcases refined technologies coupled with paramount fabrics and insulations to deliver the best in durability, comfort, and ease of use. Incorporating maximum weather protection and enhanced breathability with GORE-TEX®, and the most technical, lightweight, and warm insulation from PrimaLoft®, SCOTT's Mountain gloves are designed to protect athletes who engage in high-intensity activities, from mountaineering to back-country skiing. The new 2014.15 Mountain Gloves highlight an enhanced thermal motion fit, with newly designed finger-tip construction for better feedback and ease of use with tools, ropes, and ski poles.

FREESKI GLOVES

Offering a range of protection, from the burliest all mountain glove to a minimal park glove, the new 2014.15 Freeski glove collection combines fashion with function to deliver gloves that speak to the wide range of freeskiers. Whether you spend your days dipping off the backside or jibbing through the park, the 2014.15 SCOTT Freeski collection will keep any athlete warm, comfortable, and protected.

SNOWSPORTS GLOVES

The SCOTT 2014.15 Snowsports glove collection is a tight offering showcasing technical specification for a varying range of skiers. With top of the line fabric technologies, including GORE-TEX®, HIPORA®, PrimaLoft® and more, SCOTT gloves ensure a warm, dry and comfortable fit for long days on the slopes. New for 2014.15 SCOTT has created a new fit story, empowering skiers to choose the warmth and fit that suits their athletic needs. Ranging from comfort fit, to regular fit, to tight fit, SCOTT gloves continue to deliver premium technologies and guaranteed warmth, now customized for the individual athlete.

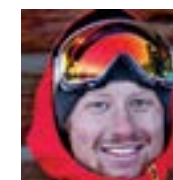

Flory Kern (GER),
SCOTT Mountain Guide

"I used the MNT Free 20 GTX glove for most of the winter 2014 season, especially during my nine week Heli-skiing trip (where gloves get used a lot, ski loading and unloading). The general fit is very good and this glove is super comfortable. It keeps my hands warm even though it is not a bulky glove. Generally for Freeriding in moderate temperatures down to -10 degree the glove works perfectly. I use the glove for most of my snow activities - Freeskiing and Ski-touring."

Dane Tudor (US)

Juan Bergada (ARG)

Luca Rolli (IT)

Felix Berktold (GER)

WHAT IS NEW ON SCOTT GLOVES 2014.15?

FREESKI AND SNOWSPORTS GLOVE FEATURES

Conductive Fingers

Operate your smart phone with your gloves on.

Dual Tech Palm

The ideal dual fabric combination for performance grip and flexibility in the palm of your hand.

Sealed Water Repellent Zippers

Water repellent zippers to help keep precipitation on the outside.

Cuff closure

Easy cuff adjustments with only one hand, helps keep snow on the outside of the glove.

Leash

Keep your gloves close by at all times.

Neoprene cuff

Maximum warmth and comfort with a tight, neoprene cuff.

Silicon Palm Print

Enhances grip on poles, ski, and other ski equipment.

Chamois wipe

Soft and absorbent fabric inlay to clear away precipitation or moisture.

Snap Tech

Keeps your gloves connected so you're never faced with a stray.

Wrist closure

Improved comfort and protection for all-day wear.

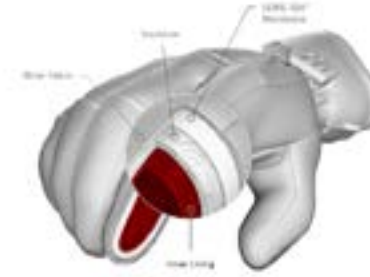

SCOTT GLOVE TECHNOLOGIES

MEMBRANES:

GORE-TEX®

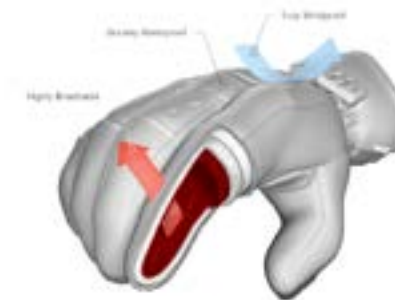

Gloves engineered with GORE-TEX® inserts are durably waterproof, windproof and highly breathable - guaranteed. They offer enduring weather protection and comfort, balanced heat transfer and optimum moisture management - even in harsh conditions. As a result, your hands stay warmer when it's cold, and drier when you perspire.

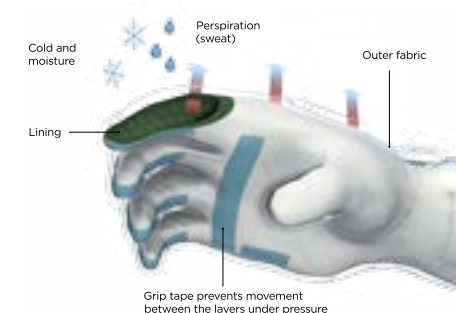

GORE-TEX® with XCR® product technology

Gloves engineered with GORE-TEX® inserts plus XCR® product technology are durably waterproof, windproof and extremely breathable - guaranteed. To maximize comfort in an even wider range of temperatures and activity levels, the whole system of inner lining, membrane and outer material is optimized for extreme breathability.

GORE-TEX® with X-TRAFIT™ product technology®

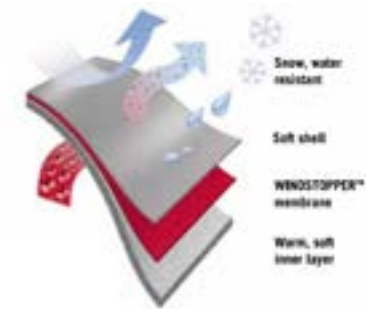

Gloves engineered with GORE-TEX® inserts plus X-TRAFIT™ product technology offer durable waterproofness and windproofness combined with optimized breathability - guaranteed. Thanks to their innovative layered construction, they provide better and high dexterity for an optimum grip. This makes it easier to handle your ski poles, zippers, glasses, bags, etc.

WINDSTOPPER®

WINDSTOPPER® fabric provides a windproof barrier with maximum breathability to keep hands warmer, drier and more comfortable.

HIPORA®

HIPORA® is a unique polyurethane insert technology consisting of numerous tiny flakes placed all over the polyurethane coated film. The film shuts out water.

FABRICS:

K-Schoeller®

K-Schoeller® is an extreme protective fabric comprised of high-tensile fibers that provides high durability with temperature stability and comfort. Extremely abrasion proof, tear resistant, and protective against the elements, K-Schoeller® endures the most intense outdoor activities while comfortably protecting the athlete.

CORDURA®

CORDURA® is a high performance, abrasion resistant fabric. Constructed using high tenacity fiber technologies, CORDURA® fabrics are exceptionally durable allowing products made with CORDURA® to be strong and long-lasting.

INSULATION:

PrimaLoft®

PrimaLoft® insulation products offer superior performance in cold weather. PrimaLoft® is lightweight, breathable and proven to repel water better than any other synthetic or natural insulation. With PrimaLoft® you stay dry, warm, and comfortable even in the most extreme conditions.

FREESKI GLOVE HIGHLIGHT

ATHLETIC PERFORMANCE IN A FASHIONABLE GLOVE, THE SCOTT MNT FREE 20 GTX GLOVE DELIVERS WARMTH AND PROTECTION WITH A GORE-TEX® MEMBRANE AND LEATHER SHELL, IN ADDITION TO SUPERIOR TACTILITY AND DEXTERITY BECAUSE OF THE X-TRAFIT™ PRODUCT TECHNOLOGY.

GORE-TEX® GLOVES ENGINEERED WITH X-TRAFIT™ PRODUCT TECHNOLOGY

The ideal solution for park & pipe, racing, freeriding and mountaineering: durable waterproof, wind-proof and breathable. A special bonding technology attaches the normally loose layers to each other preventing movement between them. The result: optimum grip on the ski poles and better dexterity for handling zippers, glasses, bags a. s. o.
